

Hướng dẫn tùy chỉnh và phát triển dự án với Wordpress 6.0.2

Chú ý: wordpress hiện tại đã có version 6.0.3, 6.1 (19/11/2022)

Trên môi trường PHP 8.1 hiện tại sẽ bị lỗi, do đó, SV nên sử dụng WordPress 6.0.2

Bước 1

Chuẩn bị source wordpress 6.0.2

Database

wordpress_602_core

1-core: source core Wordpress, không được code ở đây

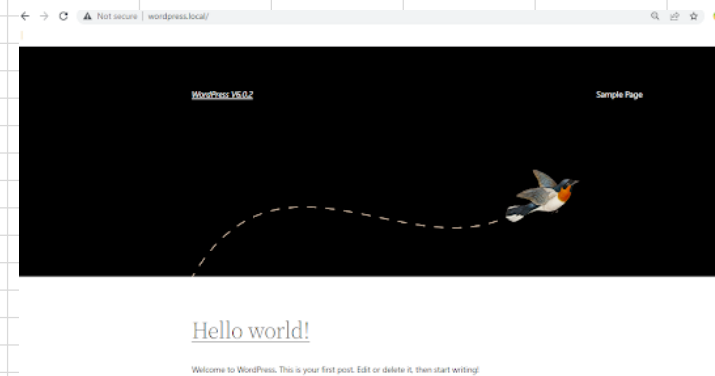

1-master: source chính của nhóm

3-job: source phát triển công việc, trạng thái đang phát triển

Bước 2

Cấu hình virtualhost thành công

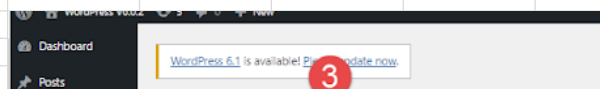

<http://wordpress.local>

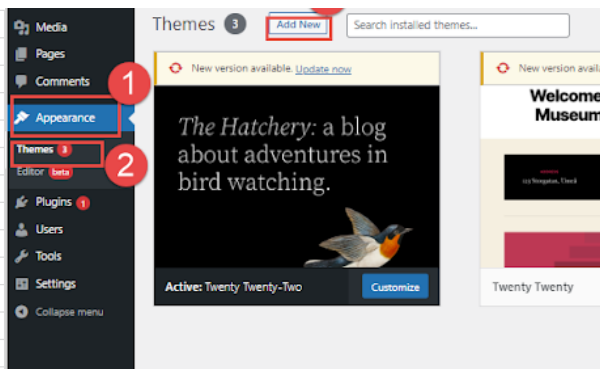

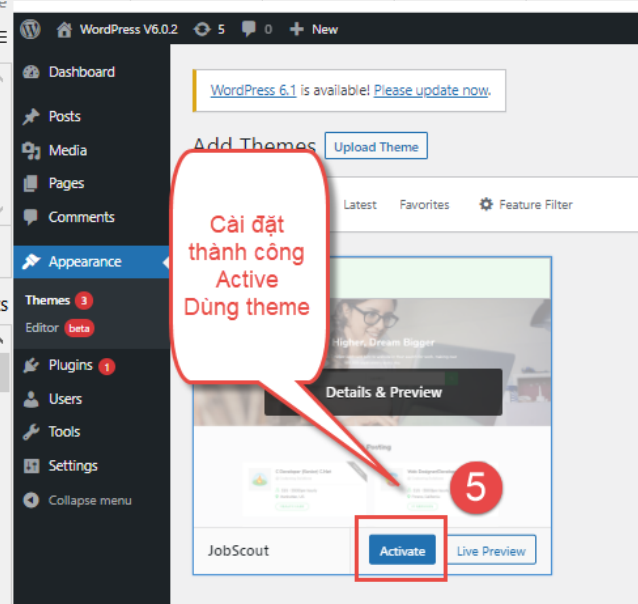

Bước 3

Cài đặt theme

Đăng nhập vào trang quản trị, chọn như hình

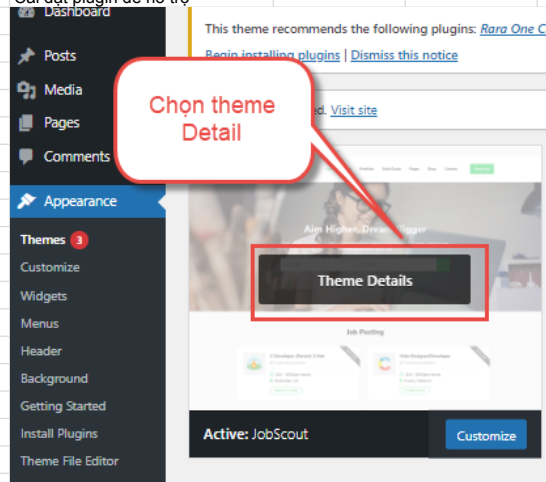

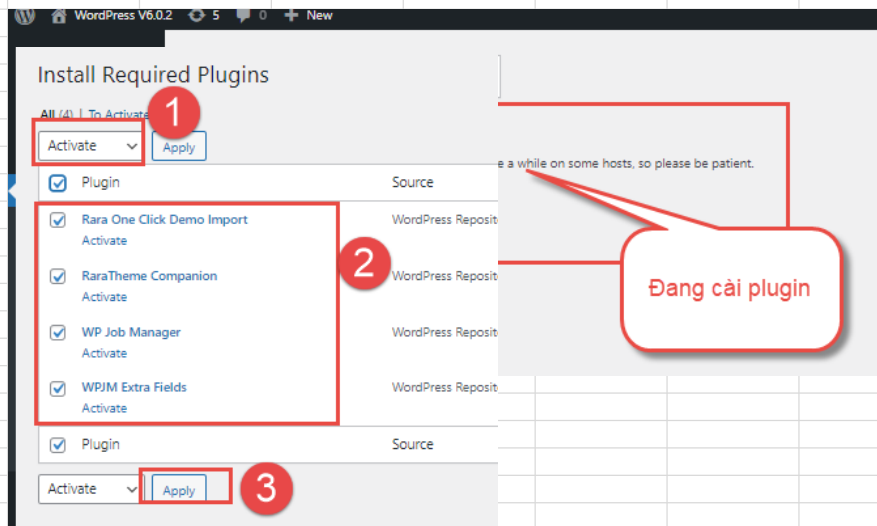

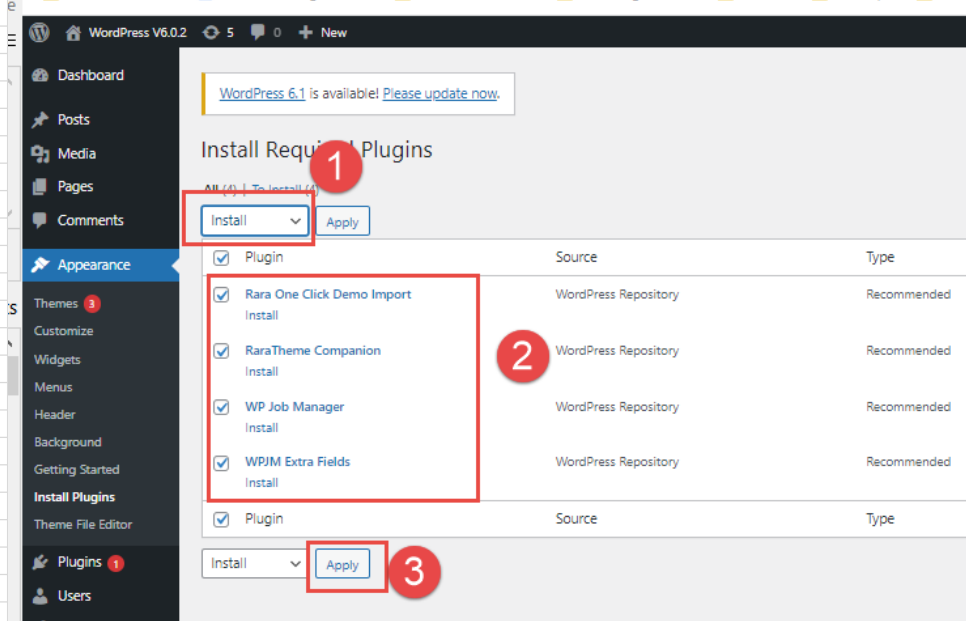

Bước 4

Cài đặt sample data

WP Job Manager Setup

1. Introduction **2. Page Setup**

Welcome to the Setup Wizard!

Thanks for installing *WP Job Manager*! Let's get your site ready to accept job listings.

This setup wizard will walk you through the process of creating pages for job submissions, management, and listings.

If you'd prefer to skip this and set up your pages manually, our [documentation](#) will walk you through each step.

☐ Help us make WP Job Manager better by allowing us to collect [usage tracking data](#). No sensitive information is collected.

WP Job Manager Setup

1. Introduction2. Page Setup3. Done

Page Setup

With WP Job Manager, employers and applicants can post, manage, and browse job listings right on your website. Tell us which of these common pages you'd like your site to have and we'll create and configure them for you.

(These pages are created using [shortcodes](#), which we take care of in this step. If you'd like to build these pages yourself or want to add one of these options to an existing page on your site, you can skip this step and follow the detailed instructions.)

	Page Title	Page Description
☒	Post a Job	Creates a page that allows employers to post new jobs directly from a page on your website, instead of requiring them to log in to an admin area. If you'd rather not have a page for posting jobs, you can skip this step. If you want employers to use the admin dashboard only -- you can uncheck this setting.
☒	Job Dashboard	Creates a page that allows employers to manage their job listings directly from a page on your website, instead of requiring them to log in to an admin area. If you don't want a page for managing job listings from the admin dashboard only, you can uncheck this setting.
☒	Jobs	Creates a page where visitors can browse, search, and filter job listings.
